growth as an example, the risk avoidance strategy is not always the best option. These assets could be in the form of equipment, employees, clients or other vital parts of the business. All Hartford coverages and services described on this page may be offered by one or more of the property and casualty insurance company subsidiaries of The Hartford Financial Services Group, Inc. For business, it is sometimes an unsatisfactory approach to dealing with many risks. If a workplace has outdated equipment that exposes workers to risks, they may use risk management vs risk avoidance strategy. This risk avoidance approach would be detrimental to this business and would stop this business from even getting off the ground. Risk is avoided when the organization refuses to accept it, which means the risk is not permitted to come into existence. There are a number of ways risk avoidance can be implemented, including risk strategies where the organization either chooses to not engage in an operation or chooses to shut down an operation because of the risk. Rather than mitigating existing risk, it aims to eliminate the source of the risk altogether, sometimes replacing it with a smaller, more easily manageable risk. The Hartford® is The Hartford Financial Services Group, Inc. This differs from a risk avoidance strategy, which would eliminate the risk by removing the equipment and replacing it with a safe alternative. This would include ensuring there are safe work procedures and providing protective equipment to the workers. The risks must be balanced and managed, but avoiding them completely is often unfeasible.
